HYDRAULIC EXCAVATOR

Model code	: ZX350-7G / ZX350LC-7G	ZX350H-7G / ZX350LCH-7G
Engine rated power	: 200 kW (268HP)	200 kW (268HP)
Operating weight	: 31 900 - 34 100 kg	34 000 - 35 300 kg
Bucket capacity	: 1.38 - 1.86 m ³	1.38 - 2.0 m ³

GET MORE FROM YOUR MACHINE

You're at the heart of Hitachi Construction Machinery's design for its latest range of excavators. To continuously improve on previous generation machines, we've focused on enhancing your profit in business.

We have made cost reduction for our customers our top priority and, in doing so, have achieved reduced fuel consumption. The cab has been redesigned to improve the operator's working environment and controllability, with production also expected to improve. An engine that already has a proven track record of high reliability has been adopted, and we have placed further work in it to make it even more robust. Remote failure diagnosis, monitoring, and OTA (Over The Air - controller rewriting) are also supported to reduce downtime.

INSIDE

4-5 | MORE FUEL EFFICIENCY

6-7 | BETTER OPERABILITY

8-9 | HIGH DURABILITY AND RELIABILITY

10-11 | SMOOTH MAINTENANCE

12-13 | MACHINE MANAGEMENT

MORE FUEL EFFICIENCY

Improved HISOIII hydraulic system matched with a new engine improves the ZX-7G fuel efficiency and fuel cost.

Reducing fuel consumption

With the reduction of fuel consumption in each mode compared to conventional models, the new model will contribute to increasing your profit.

HIOS III hydraulic system

The hydraulic system developed was based on the concept of a hydraulic system that fits in-line with a sense of human operation.

✓ Efficient hydraulic control achieves smoother and more speedy movement of front attachments.

Fine-tuned hydraulic pump control

A solenoid valve mounted on the hydraulic system further controls the pump flow rate to reduce unnecessary load on the engine.

✓ Contributing to low fuel consumption operation

High efficiency engine

A common rail type fuel injection system is used to electronically control fuel quantity and injection timing for more efficiency in fuel combustion.

✓ Contributing to high engine power and low fuel consumption.

Operation support system for high efficiency

ECO gauge

A gauge displays the current fuel consumption during an operation with a higher mark on the gauge indicating a lower fuel usage. The eco-gauge helps to support the operator in achieving lower fuel consumption throughout the work required.

ECO guidance

Prompts the operator to better fuel economy. Messages are also shown while the ECO gauge is displayed.

✓ Prompts operator for better economy

BETTER OPERABILITY

In the cab of the ZAXIS-7G, enhanced comfort and safety features are at your fingertips, offering the power to perform greater productivity with ease as well as reduced fatigue.

Operation is easy with ergonomically designed controls and switches.

Low-reflective color 8" monitor, 42% larger display compared to ZX-5G series. Easier to view and navigate. Bluetooth® and optional USB power supply available.

New designed pilot shut-off lever
The newly designed pilot shut-off lever allows easier locking and unlocking with wrist operation.

AERIAL ANGLE (Optional)
270-degree bird's eye-view camera system is available as an option.

HIGH DURABILITY AND RELIABILITY

Completing a project on time and on budget depends on the ability of your construction equipment to perform all day, every day. That's why the owners have profited from generations of reliable and durable machinery. Hitachi Construction Machinery develops its machines with constant awareness of the need to further improve long-term reliability. High long-term reliability is good in not only performance all day, every day but also for resale value.

An engine with improved reliability

The engine is a highly reliable model that has already been adopted previously. In adopting it for the ZX-7G, we have put in our efforts to further increase durability and to boost your uptime. EGR (Exhaust Gas Recirculation) is removed from the engine, increasing its durability for using low-quality fuel.

✓ Reinforced motor cover

Enlarged track guard

✓ Reducing wear and damage risks on the track link and lower roller.

Structurally improved upper roller, lower roller, and the front idler

✓ Maintains lubrication performance in the roller and improves roller durability

Heavy-Duty model ZAXIS 350H / 350LCH

The heavy duty model is more durable with reinforced load-bearing points on the excavator

High reliable fuel circuit

Larger fuel pump and changing filter locaton improve the reliability of the entire fuel circuit and further help to prevent engine problems. Contributing to boost your uptime.

Reinforced plat form plate

✓ Increased plate strength and deformation-resistant structure

Equipped with an expansion tank

✓ Improving the reliability of the engine cooling performance

SMOOTH MAINTENANCE

Regular maintenance is essential for the machine to achieve high performance. ZAXIS excavators are designed for ease of regular maintenance. Simple and easy maintenance keeps the machine in good condition and keeps its high performance.

Easy to clean radiator/Oil cooler/Inter cooler core

Dust-proof indoor net

- ✓ Provided at the front of radiator
- ✓ Easy to be removed and cleaned

Cleaning port for radiator/Oil cooler/Inter cooler core

- ✓ The cover can be opened without the need for any tools
- ✓ Easy to clean radiator/Oil cooler/Inter cooler core with simple air blowing

Easy-access air conditioner condenser

- ✓ The condenser can be opened
- ✓ Easy to clean radiator/Oil cooler/Inter cooler core with simple air blowing

Remote lubrication of arm-end pin

- ✓ Reducing the risk of mud stuck in the lubrication port
- ✓ Performs smooth lubrication

Easy access to filters

Filter locations are concentrated in the pump room

- 1 Fuel main filter
- 2 Fuel pre-filter with water separator
- 3 Engine oil filter
- 4 Pilot filter

Handrail (optional)

Handrails have been installed on the platform to allow safer access to the engine and maintenance work around the engine

MACHINE MANAGEMENT

Hitachi Construction Machinery offers a wide range of after-sales services to help you feel in total control of your fleet and workload. These initiatives give you access to vital data and tools to manage your machine.

A wide range of data on Global e-Service enhances efficiency.

Data report

Regular reports inform you of the machine's operation status. Emergency reports inform you of alarm information. The stable operation of the machine is further supported with two types of reports visualizing the machine's daily operation status.

Monthly report

Regular reports on the operating status of each machine.

Alarm report

If an emergency alarm is generated from a sensor mounted on the machine, its alarm content is reported by e-mail in a timely manner. You can receive it on your computer, mobile phone, or smartphone (communication format is via e-mail).

movie for further info.

ConSite Air

This is a service solution to diagnose machine status and update software from a remote location using OTA (Over The Air).

- Machine status, including error code display and sensor data, can be checked quickly, reducing downtime due to machine trouble.
- Software updates can be performed remotely, reducing the amount of machine downtime required.

Remote Diagnosis

Remote Software update

movie for further info.

ConSite Pocket

ConSite Pocket sends you real-time alerts for issues arising with your machine. You'll receive recommendations on what to do and step-by-step help guides. The app also enables you to see the location of your fleet.

- Use your smartphone to check monthly reports, alarm reports, as well as machine operating positions.
- If an alarm report is generated, the system will notify you immediately using a push notification.

Monthly report

Machine finder

Location information

movie for further info.

ConSite Shot

This is a smartphone application that allows you to easily perform daily inspections of your machines and rental warehousing / delivery management.

- You can easily create high-quality inspection reports and share information within your company or with agents etc.
- Customers who have rental machines can also use it during rental warehousing / delivery inspections.

Load condition

Acceptance or delivery inspection of rental machines

Inspection report with condition photo

movie for further info.

ConSite OIL

This system detects if the oil quality has deteriorated, due to contamination or low viscosity. If this happens, you and your authorized dealer will receive an alert.

movie for further info.

SPECIFICATIONS

ENGINE	
Model	Isuzu AE-6HK1XWSA
Type	4-cycle water-cooled, common rail direct injection
Aspiration	Turbocharged, intercooled
No. of cylinders	6
Rated power	
ISO 14396 : 2002 gross	200 kW (268HP) at 1 900 min ⁻¹ (rpm)
ISO 9249 : 2007 net	190 kW (254HP) at 1 900 min ⁻¹ (rpm)
Maximum torque	1 069 Nm (109 kgfm) at 1 500 min ⁻¹ (rpm)
Piston displacement	7.790 L
Bore and stroke	115 mm x 125 mm
Batteries	2 x 12 V

HYDRAULIC SYSTEM			
Hydraulic Pumps			
Main pumps	2 variable displacement axial piston pumps		
Maximum oil flow	2 x 288 L/min		
Pilot pump	1 gear pump		
Maximum oil flow	30.2 L/min		
Hydraulic Motors			
Travel	2 variable displacement axial piston motors		
Swing	1 axial piston motor		
Relief Valve Settings			
Implement circuit	34.3 MPa (350 kgf/cm ²)		
Swing circuit	32.4 MPa (330 kgf/cm ²)		
Travel circuit	34.3 MPa (350 kgf/cm ²)		
Pilot circuit	3.9 MPa (40 kgf/cm ²)		
Power boost	38.0 MPa (338 kgf/cm ²)		
Hydraulic Cylinders			
	Quantity	Bore	Rod diameter
Boom	2	145 mm	100 mm
Arm	1	170 mm	115 mm
Bucket	1	140 mm	95 mm

UPPERSTRUCTURE	
Revolving Frame	
D-section frame for resistance to deformation.	
Swing Device	
Axial piston motor with planetary reduction gear is bathed in oil. Swing circle is single-row. Swing parking brake is spring-set/hydraulicreleased disc type.	
Swing speed	10.7 min ⁻¹ (rpm)
Swing torque	120 kNm (12 200 kgfm)

UNDERCARRIAGE	
Tracks	
Heat-treated connecting pins with dirt seals. Hydraulic (grease) track adjusters with shock-absorbing recoil springs.	
Numbers of Rollers and Shoes on Each Side	
Upper rollers	2
Lower rollers	7 : ZX350-7G / ZX350H-7G
	8 : ZX350LC-7G / ZX350LCH-7G
Track shoes	45 : ZX350-7G / ZX350H-7G
	48 : ZX350LC-7G / ZX350LCH-7G
Track guards	3 : ZX350-7G / ZX350LC-7G
	Full track guard : ZX350H-7G / ZX350LCH-7G
Travel Device	
Each track driven by 2-speed axial piston motor. Parking brake is spring-set/hydraulic-released disc type. Automatic transmission system: High-Low.	
Travel speeds	High : 0 to 5.0 km/h
	Low : 0 to 3.2 km/h
Maximum traction force	298 kN (30 400 kgf)
Gradeability	70% (35 degree) continuous

SERVICE REFILL CAPACITIES	
Fuel tank	630.0 L
Engine coolant	41.0 L
Engine oil	41.0 L
Swing device	15.7 L
Travel device (each side)	11.0 L
Hydraulic system	340.0 L
Hydraulic oil tank	180.0 L

MACHINE CAPACITIES

- Notes:
- 1. Ratings are based on ISO 10567 : 2007.
 - 2. Machine capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
 - 3. The load point is the center-line of the bucket pivot mounting pin on the arm.
 - 4. *Indicates load limited by hydraulic capacity.
 - 5. 0 m = Ground.

A: Load radius
B: Load point height
C: Machine capacity

For machine capacities, subtract installed attachment and quick hitch weight from machine capacities.
To determine lifting capacities, apply "Rating over-side or 360 degrees" machine capacities from the table and deduct weight of installed attachment and quick hitch.
Optional feature may affect machine performance.

MACHINE CAPACITIES

- Notes:
- 1. Ratings are based on ISO 10567 : 2007.
 - 2. Machine capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
 - 3. The load point is the center-line of the bucket pivot mounting pin on the arm.
 - 4. *Indicates load limited by hydraulic capacity.
 - 5. 0 m = Ground.

A: Load radius
B: Load point height
C: Machine capacity

For machine capacities, subtract installed attachment and quick hitch weight from machine capacities.
To determine lifting capacities, apply "Rating over-side or 360 degrees" machine capacities from the table and deduct weight of installed attachment and quick hitch.
Optional feature may affect machine performance.
